

## Technical Data

Solvent	Hydrocarbon   Acetone
Propellant	Ether
Solids content (approx.)	35%
Spray pattern	Web
Colour	Blue
Coverage (approx.)	2,5m <sup>2</sup>
VOC	565 g/l
Heat Resistance	70°C
Open time	Up to 60 min.
Drying time	2-5 min.
Shelf life	12 months
Storage temperature	15°C - 35°C

## DASA DS-804 Aerosol

### Features

- Uniform spray
- Fast easy application
- High solids
- Long open time
- Bonds to a wide variety of substrates
- Dichloromethane free

### Properties & application

- A non-chlorinated, high tack spray adhesive, designed for bonding polystyrene to itself and various substrates including MDF, chipboard, plywood and other timber sheet materials. It will also bond to most common building materials such as plasterboard, aluminium, concrete, brickwork and steel.
- Always test a small sample of the materials first to ensure the suitability of the product for the application.

**DO NOT USE ON FLEXIBLE PVC.**

## Directions for use

1. Shake well before use.
2. Surfaces should be clean, dry and free from grease, oil and dust.
3. Hold the spray can vertically at an angle of 90° and spray with a distance of 10-20 cm to the surface to be sprayed.
4. For one-way application, let adhesive dry for 30 seconds until tacky and then press into position.
5. For two-way application, spray both surfaces (one surface vertically the other horizontally) and allow to dry for 2 – 5 minutes before bonding.
6. For temporary bonding, spray one surface and allow to dry for 2 – 5 minutes before bonding.
7. To prevent the spray nozzle from blocking, at the end of each period of use, turn the can upside down and press nozzle until spray is clear of adhesive.
8. Excess adhesive can be removed with a suitable solvent cleaner such as white spirit.

## Limitations

**DASA DS-804** dries in two to five minutes under normal conditions, but this will vary under different temperatures and humidities. High humidity and low temperatures will slow the drying time and if the temperature gets very low, can produce bloom. Bloom is moisture which forms on the glue line caused by solvent evaporation lowering the air temperature above it.

## Storage

Protect from extremes of temperature in a controlled environment between 15 and 35°C, and away from direct sunlight. **Do not stand on a cold concrete floor.** Low temperatures can result in irreparable separation of the adhesive. Stored under the correct conditions, in original, unopened containers, the product will have a shelf life of 12 months.

**DO NOT ALLOW THE PRODUCT TO FREEZE**

### Disclaimer

All the information in the Data Sheet is based on practical experience and is published in good faith. However, because we have no control over the manner or conditions in which our products are used, or over work undertaken or end product manufactured by the purchaser, we cannot accept liability for results.
